

SAFETY ALERT

Crib Bumper Pads Pose a Suffocation, Strangulation & Choking Hazard for Babies

Do not use crib bumpers in cribs, bassinets and other sleep environments.

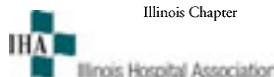

What You Need to Know

- ✓ Due to their lack of strength and motor development, infants may suffocate, choke and/or become strangled in a crib bumper.
- ✓ The American Academy of Pediatrics, Kids in Danger, American SIDS Institute, SIDS of Illinois, and the Canadian Health Department all warn parents not to use crib bumpers.
- ✓ The U.S. Consumer Product Safety Commission is re-examining the safety of crib bumpers.

Questions? Please visit www.IllinoisAttorneyGeneral.gov or call 1-888-414-7678 (TTY: 1-800-964-3013).

ALERTA DE SEGURIDAD

Protector de cuna pone en riesgo de sofocar o estrangular a bebés

No use protectores en la cuna, un moisés o cualquier otro ambiente en donde duerme su bebé.

Lo que debe saber

- ✓ Por la falta de fuerzas y falta de desarrollo motriz, los bebés pueden sofocarse o estrangularse con protectores de cuna.
- ✓ La American Academy of Pediatrics, American SIDS Institute, Canadian Health Department, Kids in Danger, American SIDS Institute, y SIDS of Illinois sugieren a los padres que no usen protectores de cuna.
- ✓ La Comisión de Productos Seguros de Consumo de los EE.UU. vuelve a examinar la seguridad de los protectores de cuna.
